

Code42 + Okta

An End-to-End Solution for Data Security in the Cloud

Seamless Cloud Data Protection and Identity Management

In the modern enterprise, identity and access management are more important than ever. Now through seamless, SAML-based integration with Okta, the world's leading cloud-based identity management solution, Code42 customers can fully manage changing roles, permission levels and credentials.

Security that Won't Slow Users Down

The partnership with Okta furthers our commitment to delivering data security solutions that mitigate increasing and evolving threats—without impeding employee productivity or overburdening IT and InfoSecurity teams.

Easy for End Users	Easy for IT
Single sign-on Okta Cloud Connect (OCC) integrates Code42 with Active Directory/LDAP for fast and free single sign-on and provisioning. No more password reset fiascos. No more profile synchronization headaches.	Universal Directory OCC enables IT to manage users' access to any application or device with a single, universal directory. No more messy integrations. No more juggling multiple identity management platforms.

Code42 + Okta highlights

Okta Cloud Connect is free for all Code42 customers and includes the following:

- ▶ Perpetual license and unlimited user count (Free when connected to one app)
- ▶ Directory integration (AD/LDAP)
- ▶ Single sign-on
- ▶ Provisioning
- ▶ Universal Directory
- ▶ Online support (3 tickets/year)

"Code42 has a proven history of securing its customers by providing endpoint data protection. Now, Code42's SAML-based identity integration with Okta will address a critical security gap every company faces: protecting data shared in the cloud."

Chuck Fontana, VP of Business Development Okta
