

Code42 + Zapproved

Turn the power of endpoint data into a complete eDiscovery solution

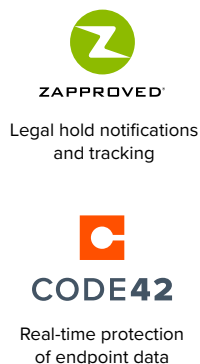

Code42 is proud to partner with Zapproved to offer Legal Hold Pro, the number one litigation hold software, to create a defensible, streamlined legal hold and collections process. This partnership empowers enterprises to bring eDiscovery in house, reducing costs, risks, and dependence on both internal IT and outside counsel.

Key Benefits

- ▶ Automate and expand your data preservation and collections workflow from end-to-end
- ▶ Empower Legal to preserve and collect computer data without IT support
- ▶ Improve the defensibility of your process to prevent spoliation and sanctions
- ▶ See a complete audit trail of all preservation and collection activities
- ▶ Better data management for strategic initiatives across the organization

Key Features

- ▶ Manage custodians, legal hold templates, questionnaires and reports from one central repository
- ▶ Automatically track custodian responses and trigger reminders and escalations
- ▶ Apply preservation holds to custodian computer data with a single click
- ▶ Allow custodians to respond to holds with one click from any device
- ▶ Create a complete, defensible audit trail of all preservation activity

CloudPreserve™
Streamlined
preservation workflow

"The partnership between Code42 and Zapproved represents what the next-generation of collections looks like. By leveraging the power of cloud backups for PCs for eDiscovery, legal departments can take an onerous task of retrieving data off of individual devices and do it in a matter of minutes. It's defensible, efficient, and minimizes business disruptions by taking employees offline."

Monica Enand, CEO/Founder Zapproved
