

HOW INCYDR™ BENEFITS YOUR IT, LEGAL, HR AND FINANCE TEAMS

Different functional teams have distinct concerns when it comes to insider threat. Fortunately, Code42 Incydr™ can solve those issues without impeding collaboration or slowing productivity. Because Incydr provides visibility to all data, each team gains unique benefits.

IT

Team challenges:

- Provide and manage the tools and infrastructure necessary for employees to get their jobs done, while also securing and protecting data
- Ensure the security tools in place do not slow down collaboration or productivity, or have a negative impact on business processes

Incydr benefits:

- Streamline data protection without cumbersome classification systems or blocking policies
- Quickly detect, investigate and respond to data security threats

LEGAL

Department challenges:

- Effectively investigate suspected insider threat activities that result in data or intellectual property theft
- Gather enough sufficient evidence to take action

Incydr benefits:

- Gain complete visibility into where and how data is accessed and stored
- Look back 90-days to review suspicious activity
- Save a copy of all exfiltrated data so you know exactly what has been taken
- Accelerate the forensic investigation process and provide the legal team with indisputable evidence for litigation or prosecution

HUMAN RESOURCES

Department challenges:

- Protect the company from financial or reputational damage when departing employees or high-risk individuals take sensitive data
- Ensure new hires aren't bringing outside intellectual property with them (usually from their previous role) into the corporate environment

Incydr benefits:

- Simplifies the process of managing and cleaning up access to sensitive data as employees switch roles within the company
- Resolve employee investigations or standard onboarding and offboarding audits quickly and with certainty

FINANCE

Department challenges:

- Protect intellectual property from theft and loss, which can derail most mergers and acquisitions; intellectual property is the foundation of a company's value

Incydr benefits:

- Collect, protect and secure data in a target company's environment; provide the visibility necessary to safeguard intellectual property while preserving the value of the target before, during and after the deal closes
